RATING

## Support

We act as an extension of your team to help you work through the tricky parts of running a successful LMS. With unlimited support, our team is here to answer any question big or small. Whether you need input on a new plugin or you're dealing with a sticky situation, our team will quickly help resolve your problem. Our goal is to provide a human response (not a bot!) in less than an hour, as the average response time to your request.

## AWS Cloud Hosting

Experience the best-in-class hosting environment of Amazon Web Services (AWS), which provides you with the security, flexibility, and scalability you need. Our team is experienced in ensuring your hosting environment meets your growing and changing needs.

### Open-Source Solutions

Why open source? We configure, manage, and continue to contribute to open-source LMS solutions because they provide you with the ultimate flexibility to build your ideal solution. Our open-source solutions can be integrated with a large variety of plugins, support many different content types, and be customized to meet your goals. We offer both single-tenant and multi-tenant solutions.

### If it's open source, why don't I self-host?

We like to say that free isn't really free when it comes to open source. We support open-source LMS solutions because they provide the most innovative and flexible solutions for institutions and organizations of all kinds. However, opensource hosting takes energy, time, and a deep level of expertise. Our team takes the strenuous and sometimes stressful task of hosting and managing your LMS off your hands. We're the best at what we do and offer unlimited support to you to build the perfect customized learning management solution.
