

End-to-End Training for Business-Critical Skills

Realizeit allows you to bring the power of Adaptive Learning to your business-critical training needs with less effort than you ever imagined. Train with precision for your critical job roles when everything adapts uniquely to each learner's needs. End one-size-fits-all – just add your content!

Adaptive Onboarding

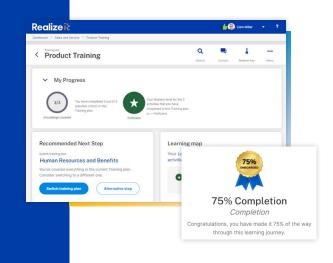

Great new-hire training demonstrates your company's investment in its people. Give new employees confidence in their most critical job functions and let them know they made the right choice.

- Automatically personalize the learning pathway for each new hire
- Adapt to each learner's experience, knowledge, and job role
- Speed up onboarding and get to competency faster
- Assure that business-critical training gets employees job-ready with the right amount of practice and continuous assessment.

Adaptive Ongoing Learning

Reinforcement is critical to ensure the training for your most critical jobs is retained. Realizeit has ongoing learning covered from every angle, adapting to each learner's needs.

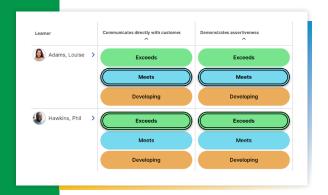

- Al-powered reinforcement of what is most important
- Focus where improvement is needed on a personalized level
- Connect directly to the right content when skills need refreshing
- Deliver knowledge updates automatically in bitesized alerts

Adaptive Reskilling

Upskilling and Reskilling must be done with precision and validation of learning when new job skills are business-critical. Keep employees growing in their role and get them ready for the next critical function with an adaptive approach.

- Create job and skills-oriented learning journeys
- Speed up reskilling and build organizationalnal agility
- Deliver a seamless experience across eLearning, live instruction, 1-to-1 training, coaching, and on-the-job experiences
- Integrate internal and professional learning content into a seamless journey

Adaptive Learning

Break away from one-size-fits-all and create more precision in learning that business-critical training and learning demands. Transform your current approach to leverage Al and continuous assessment to assure your employees are ready and learning time is optimized.

- Enhance knowledge retention with a visual map of bite-sized skills
- Speed up learning as the path adapts to the learner's knowledge
- Engage learners as you give them control of their path
- Increase eLearning effectiveness with varied activities including surveys, discussions, assessments, live instruction, and coaching

The attractiveness is in the digital mobile experience, but the value is in the 'adaptive piece'.
